

Company Profile

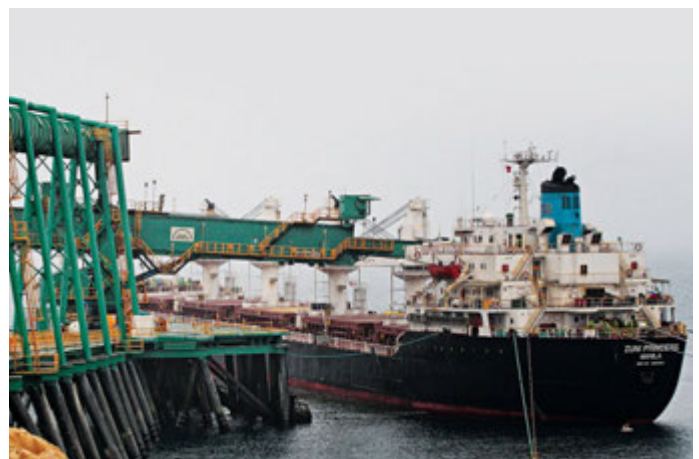

Intercoastal Marine Inc. is the leading marine construction company in the areas of engineering and marine construction in Panama, Central America, and the Caribbean. IMI is part of the company group which includes Salfacorp from Chile and the construction company Conconcreto from Colombia.

Intercoastal Marine Inc.'s specialties include design and construction of marine, lacustrine, and fluvial works for the port, mining, fishing, energy, forestry, and oil and gas sectors, among others. Furthermore, the company specializes in the development of integral solutions for marine infrastructure under EPC (Engineering, procurement, and construction) modality.

IMI is characterized by creating close relations with its clients, achieving solutions in accordance with the needs of each, and we particularly characterize ourselves by the efficiency in our construction processes, compliance with work schedules, excellence in the level of quality of our products, and our ability to diminish operational risks.
